

Epps Aviation approaching 50th Anniversary Celebration

ORLANDO, FL, October 21, 2014 – [Component Control](#) announced today that long-standing customer [Epps Aviation](#), the only independent full service, fixed-base operator (FBO) at DeKalb-Peachtree Airport (PDK) in Atlanta, is approaching their celebration of 50 years of successful service to the aviation community. As an FAA repair station for both turbine and piston aircraft, Epps Aviation leverages Component Control's [Quantum Control™](#) MRO and Logistics software to fully manage its extensive maintenance services and corresponding accounting requirements. A testament to the company's superior service reputation, Epps Aviation is still owned and managed by Pat Epps, the original founder and current President.

"Quantum has been our operations platform for maintenance services since 2007 bringing with it great improvement in all of our shop functions from parts ordering to how the mechanics worked on the floor," said Marian Epps, Chief Financial Officer of Epps Aviation. "Workflow is more efficient and the best part is that with everything we do, we still haven't outgrown the system, it continues to grow with us." Epps Aviation is an authorized Service Center for Pilatus, Cessna, Cirrus, Mooney, Piper, Michelin, Dallas Airmotive, and Lycoming, and staffs a Designated Airworthiness Representative (DAR) to ensure efficiency and adherence to regulatory demands.

"We congratulate Epps Aviation on their impressive achievement and wish the same success to all of our customers," said Todd Lewis, President of Component Control. "Aviation services is a complex and highly regulated business and as companies not only grow, but endure time and industry changes, Quantum has been proven as a time-tested platform for managing diverse maintenance operations with ease and efficiency."

[Quantum Control™](#) is a fully integrated business software solution. Developed specifically for aviation MRO and Logistics organizations, it promotes best practices and improves business processes with a single database integrated solution that can be flexibly deployed as a dedicated in-house system, or be hosted via a third-party cloud. Quantum Control's personalized configuration settings provide individual users with an intuitive interface which improves the bottom line through optimized productivity. As a powerful, affordable and scalable solution, Quantum Control™ extends across the supply chain using its built-in web services fully integrated with www.StockMarket.aero.

The Quantum Control MRO and Logistics solution installed at Epps Aviation operates on a highly scalable and secure Oracle™ database and includes a range of logistics and business modules. For more information on the specific modules purchased by Epps Aviation, please see appendix one below.

Component Control is showcasing their market leading software, Quantum Control, at NBAA, October 21 – 23, 2014 in Orlando, FL. Visit the Component Control team at booth #4282 for more information.

Epps Aviation will be exhibiting at both the Shell Aviation booth #2040 and at the Pilatus Business Aircraft booth #4699.

About Epps Aviation

Since 1965, Epps Aviation is the only independent full service, fixed-base operator (FBO) at DeKalb-Peachtree Airport (PDK) in Atlanta. Our 140 team members are passionate about aviation and enjoy sharing their enthusiasm for flying with their customers. Epps Aviation spans a total of 21 acres at Georgia's second busiest airport and boasts eight hangars and 40 T-hangars. Epps offers fueling combined with additional FBO services, air charter, aircraft sales and management, piston and turbine maintenance, avionics, parts, non-destructive testing (NDT) and our newest service, tool calibration. For more information, go to www.eppsaviation.com.

About Component Control

Component Control, based in San Diego, Calif., is a leading developer and provider of MRO and Logistics Software solutions for the aviation industry. Its core product, Quantum Control, provides advanced aviation management support to original equipment manufacturers, aftermarket service divisions, component repair and overhaul companies, fixed base operators, aircraft completion centers, airlines, MRO facilities, and part distribution / redistribution companies. Quantum is installed in over 50 countries and can be deployed as a single-site or multinational solution.

Stockmarket.aero, also from Component Control, is an online aviation parts trading marketplace giving users access to a comprehensive search engine that includes parts in stock, MRO capabilities and part alternatives. StockMarket.aero currently lists over 50 million qualified line items of inventory and capability from over 3,000 aircraft parts vendors.

Component Control won the 'Best IT Software Provider' category in the Aircraft Technology Engineering and Maintenance Awards.
