

3 Points Aviation leverages Quantum Control MRO and Logistics Software to support growth and expansion

MIAMI BEACH, FL, MRO AMERICAS, April 16, 2015 – [Component Control](#) announced today that [3 Points Aviation Corp.](#), a provider of expendable and rotatable aviation parts, selected [Quantum Control](#) MRO and Logistics software to manage its operations and AOG needs across all of its facilities in Charlottetown, Prince Edward Island; Mississauga, Ontario; and Conception Bay South, Newfoundland, Canada.

At its Mississauga warehouse on Toronto International Airport, 3 Points Aviation stocks a large inventory of critical parts — more than 40,000 stock lines — to provide immediate service for AOG service as well as repairing and manufacturing high-usage components. Quantum Control allows 3 Points Aviation to easily track and manage the massive inventory.

In 2014, 3 Points Aviation began a large expansion of its hydraulics repair program at Charlottetown. In addition to increasing its current capacity, the expansion will also allow the company to increase production efficiencies and decrease costs for customers. Quantum Control will be an important asset in helping with those goals, according to Leo Druken, CFO, 3 Points Aviation.

“Since the beginning we chose Quantum Control as our MRP software platform. Over the last 10 years we have grown into an MRO and manufacturer and Quantum Control has been along side us to help meet our needs for a fully integrated solution,” said Druken.

[Quantum Control](#) is a fully integrated business software solution. Developed specifically for aviation MRO and Logistics organizations, it promotes best practices and improves business processes with a single database integrated solution that can be flexibly deployed as a dedicated in-house system, or be hosted via a third-party cloud. Quantum Control's personalized configuration settings provide individual users with an intuitive interface which improves the bottom line through optimized productivity. As a powerful, affordable and scalable solution, Quantum Control extends across the supply chain using its built-in web services fully integrated with www.StockMarket.aero.

The Quantum Control MRO and Logistics solution installed at 3 Points Aviation operates on a highly scalable and secure Oracle™ database and includes a range of logistics and business modules. For more information on the specific modules chosen by 3 Points Aviation, see appendix one below.

For more information on Quantum Control, visit the Component Control team at [MRO Americas](#), April 14-16 in Miami Beach, Florida, booth 1639.

About 3 Points Aviation Corp.

3 Points Aviation offers the ideal combination of technical resources, industry knowledge and comprehensive service. Through focused customer service, the company has become a leader in the supply and distribution of new and re-conditioned aircraft parts, including landing gear, propellers and engines. It specializes in providing parts and services for a variety of aircraft models such as the Dash 8 (100/200/300/400), Canadair and Embraer Regional Jets, Fokker and ATR. Transport Canada-approved, 3 Points Aviation has developed into an industry leader by being an affordable, reliable, quality products and services provider. For more information, visit www.3PTS.com.

About Component Control

Component Control, based in San Diego, California, is a leading developer and provider of MRO and Logistics Software solutions for the aviation industry. Its core product, Quantum Control, provides advanced aviation management support to original equipment manufacturers, aftermarket service divisions, component repair and overhaul companies, fixed base operators, aircraft completion centers, airlines, MRO facilities, and part distribution/redistribution companies. Quantum is installed in more than 50 countries and can be deployed as a single-site or multinational solution.

Stockmarket.aero, also from Component Control, is an online aviation parts trading marketplace giving users access to a comprehensive search engine that includes parts in stock, MRO capabilities and part alternatives. StockMarket.aero currently lists more than 100 million qualified line items of inventory and capability from over 3,000 aircraft parts vendors.

Component Control won the 'Best IT Software Provider' category in the Aircraft Technology Engineering and Maintenance Awards.
