

Meridian Helicopters Selects Quantum Control MRO and Logistics Software to Improve Tracking, Planning and Service

DALLAS, TEXAS, HAI HELI-EXPO, March 6, 2017 – [Component Control](#) announced today that Meridian Helicopters, LLC, an aviation services company that specializes in helicopter brokering, long-term leasing and maintenance, has selected [Quantum Control](#) MRO and Logistics software to enhance its inventory tracking, future planning capabilities and customer service.

“We expect 2017 to be a record year for us in helicopter leasing and brokerage services. Quantum’s accurate reports will help us in future planning,” said Michael Bashlor, Meridian Helicopters’ Managing Partner and Director of Bell Programs. “Most importantly, Quantum fills a void for us in tracking work orders, exchanges, POs and ROs in a much more efficient way. We have many vendors utilizing Quantum. They spoke highly of it.”

Based in Broussard, Louisiana, Meridian Helicopters provides helicopter brokerage services for oil and gas, corporate, geological, firefighting and government operators in South America and North America. On the leasing side, the company serves corporate, tourism and flight training operators. Meridian Helicopters also provides maintenance refurbishment capabilities, including composite, electrical, component overhaul and interiors, for the Bell Helicopter product line.

“Meridian takes great pride in offering great customer service. We always have and always will. Quantum gives us that extra little edge in planning, tracking and accuracy of inventory,” said Bashlor. “Our parent company Cadorath has been impressed with the system and is moving towards switching one of their division’s software to Quantum.”

The software is part of Meridian Helicopters’ ongoing efforts to enhance its customer service. With Quantum Control, the company can easily track and manage thousands of details easily and efficiently, and generate comprehensive reports for fast, informed decision-making and future planning.

Quantum Control MRO and Logistics solution installed at Meridian Helicopters operates on a highly scalable and secure Oracle™ database and offers various logistics and business modules. For more information on the specific modules chosen by Meridian Helicopters, see appendix one below.

[Quantum Control](#) is a fully integrated business software solution. Developed specifically for aviation MRO and Logistics organizations, it promotes best practices and improves business processes with a single database integrated solution that can be flexibly deployed as a dedicated in-house system, or be hosted via a third-party cloud. Quantum Control's personalized configuration settings provide individual users with an intuitive interface that improves the bottom line through optimized productivity. As a powerful, affordable and scalable solution, Quantum Control extends across the supply chain using its built-in web services fully integrated with www.StockMarket.aero.

For more information on Quantum Control, visit the Component Control team at HAI Heli-Expo, March 6-9 in Dallas, Texas, booth 4221. For more information on Meridian Helicopters, visit booth 21.
